PROFILE

Fullstack software developer and electronics technologist with more than 4 years of experience generating code for companies in the production and educational sector. I worked 6 months for The Little Music School as a NodeJS full stack developer, from February to July 2021, where i helped developing most of the Backend REST API for the booking site called bulowsvej10.dk. I am specialist in problem solving, teamwork and implementation of ideas for improvements, respect for Other people, punctuality and humility are very important values that I take into account.
